MISCELLANEOUS INJECTOR SERVICE PARTS

A collection of general application injector service parts

Injector Seal / Insulator	Part No. 1 280 206 702	
Application : Large square section seal located around body of D-Jetronic and early L-Jetronic type injectors		
Injector Seal	Part No. 1 280 206 703	
Application : Lower square section seal for many D-Jetronic and early L-Jetronic systems		
K-Jetronic "Hat Type" Injector Seal	Part No. 2 430 329 002	
Application : Specific to early K-Jetronic injectors used for many applications including Volvo		
Injector Seal	Part No. 3 430 210 606	
Application : Generic K & KE-Jetronic injector top seal for various vehicle applications.		
Injector Seal	Part No. 3 430 210 603	
Application : Fine cross section lower seal specifically for K-Jetronic "air shrouded" type fuel injectors including injector part numbers 0 437 502 026, 0 437 502 027, 0 437 502 041 & 0 437 502 045		
Injector Hose Ferrule	Part No. 1 280 505 710	
Application : Replacement ferrule for hose type injectors. Required for safe replacement of hose between injector and fuel rail		
Injector Hose Service Kit	Part No. 1 287 013 710	
Application : Replacement hose and ferrule kit for hose type injectors with short or long. Kit contains one short hose, one long hose and two ferrules.		
Injector Filter Basket	Part No. 1 287 430 752	
Application : Replacement internal filter to suit most Bosch fuel injectors Warning. - As a major manufacturer of fuel injectors, Bosch does not recommend or support the practice of replacing fuel injector filter baskets. The possibility of contamination of the fuel injector whilst the filter is removed, or by the removal process itself is high, possibly resulting in damage to the fuel injector valving. It is worthwhile to note that injectors that have badly contaminated filters requiring replacement, more than likely already have injector valving group damage requiring complete injector replacement
